Part III DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 21-24, and 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seike in view of Jackson (Wine Science, pp. 229 and 279-80) for the reasons set forth in the last Office Action.

3. Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Seike in view of Jackson and in further view of Castillon et al (U.S. Pat. No. 5,415,775) for the reasons set forth in the last Office Action.

Response to Arguments

4. Applicants' arguments filed 11/01/02 have been fully considered but they are not persuasive.

5. Applicants argue that the primary reference adds citrate while the claims require the citric acid to be removed. Basically, Seike teaches modification of the pH by addition of sodium citrate rather than the removal of citric acid. Applicants argue that the addition of sodium citrate will

adversely affect the flavor of the final vinegar product. As of yet no evidence has been placed on the record that conclusively supports applicants assertion.

In response to applicants' argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Applicants again argue that those of ordinary skill would not look to the teachings of Jackson because they deal with the production of wine rather than vinegar. They also state that Jackson is only concerned with malic acid. No support for this last statement could be found. Again, in response, those in the fermented food art would reduce acidity by any well known means, including that which is very old in the wine art. As for motivation, *In re Levin* has been cited previously to provide the necessary motivation for combining the cited teachings.

Conclusion

6. No claim is allowed.
7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
